

## Product Information

The **PT-11 A** has been designed for most types of headwear.

The **PT-11 A** features an easy to use microprocessor controller for time and temperature accuracy, with a simple locking device to secure the cap in place during the transfer operation.

The **PT-11 A** has adjustable movement of the cap/mould base and is easy to use.

The **PT-11 A** is produced of cast aluminium for strength and durability.

The **PT-11 A** has a work area of 15 x 8 cm (5,91 x 3,15 ins).

The **PT-11 A** bears the CE Marking.

## Technical Data

## European Version

|                          |                                 |
|--------------------------|---------------------------------|
| Power Consumption        | 400 Watts                       |
| Power Supply             | 230 Volts AC                    |
| Max. working temperature | 260°C                           |
| Display Timer Range      | 0 – 9999 secs                   |
| Machine height open      | 64 cm                           |
| Machine height closed    | 44 cm                           |
| Machine width            | 30 cm                           |
| Machine depth            | 45 cm                           |
| Weight export packed     | 13.5 kg                         |
| Size export packed       | 62.5 (L) x 37.5 (W) x 52 (H) cm |
| Net weight               | 11.5 kg                         |
| Press pad dimensions     | 15 x 8 cm                       |
| Fuses                    | 3 A                             |
